### CLEANING INSTRUCTIONS:

**Acrylic** - use a plastics cleaner or mild detergent and water.

**DO NOT use IPA (alcohol) or harsh chemicals** - these may cause cracking or damage to the acrylic.

**PETG** - use a plastics cleaner or mild detergent and water.  
 PETG is resistant to IPA (alcohol) and some chemicals.  
 Test a small amount first if unsure of results.

## PETG DISPENSERS - SAFE w/IPA

“IPA Safe” - if your Cleanroom Standard Operating Procedures (SOP) require cleaning with IPA (Isopropyl Alcohol) the dispensers should be made of PETG material.

PETG - ‘glycol-modified polyethylene terephthalate’ is a material used in a variety of applications including medical products and medical packaging. *(for additional information - check the web for “PETG”)*

PETG features:

- clear-easy to see through
- high impact strength
- can be easily cleaned
- safe w/IPA

EVERY dispenser can be made from PETG material

## STATIC DISSIPATIVE / ANTI-STATIC MATERIAL - Designed to prevent the build-up of static electricity

- Every dispenser is available in static dissipative acrylic or PETG.
- The static dissipative feature is a permanent coating that is highly abrasive resistant.
- Electrostatic decay is less than 0.05 seconds per Federal Test Standard 101C, Method 4046-1.
- Standard surface resistivity is  $10^6$  to  $10^8$  ohms per square.
- The uniform surface treatment is not affected by humidity.
